Tier/Rarity	Description
Common	Level 1 stuff - easy to get, doesn't cost much. Good for beginners, but doesn't sell for a lot.
Uncommon	A bit more special. Harder to find than Common, gives better value and maybe some cool perks.
Rare	Gets attention. Tougher to unlock. Higher sell value. Usually with traits players want.
Legendary	Big deal. Hard to find. Worth a lot. Often has standout features.
Mythical	Top tier rewards. Super rare. Might be multi-harvest or come with special powers/bonuses.
Divine	Even above Mythical. Very few players have these. Elite features or bigger returns.
Prismatic	Ultra-rare and flashy. Might have glow, special chance drops, or limited in stock. Definitely a status symbol.
Transcendent	The highest rarity (or nearly). Nearly impossible to get. Massive reward/value. A serious flex.
